

ABSTRACT OF THE DISCLOSURE

In an image forming device management system and method of the present invention, a data communication device is connected to one or a plurality of image forming devices and a central control system is connected to the data communication device via a public switched telephone network and provides a remote maintenance of the one or the plurality of image forming devices through the telephone network and the data communication device. A communication request signal is transmitted from the data communication device to the image forming device concerned. When the request signal is received by the image forming device concerned, a supplying of a power from a main power source to the image forming device concerned is automatically turned on. The supplying of the power from the main power source to the image forming device concerned is automatically turned off after a communication between the data communication device and the image forming device concerned ends.
